

HOME DUST CONTROL

BACKGROUND:

Mr. Weinz had serious dust problems inside his vacation cabin. Every year his family would have to dust twice a day. The Weinz's needed a way to treat the dust without harming the sensitive forest, stream environment there beautiful 5 bedroom cabin was located in.

Here we can see the front yard has a large dirt area, in Mr. Weinz vacation cabin.

During spring and summer just walking in the front yard lifts up dust that makes it way into the house.

I tested the standard Dustlocker 1 gallon in a few areas around the house. After drying as shown above I noticed my dog liked the clean feeling on his paws of that area.

Using the simple sprayer made applying Dustlocker a snap. I quickly decided to treat the whole front yard area, and it practically stopped the dust inside.

TESTIMONIAL:

I got rid of all my serious dust problems with just 2.5 gallons of Dustlocker. Saving me and the misses all the headaches and expenses of dusting products that always seem to take away from the natural Forest smells and they made me sneeze.

Now my cabin just smells better and seems cleaner, thanks Dustolocker you have us as customers locked in ..
